

FOREWARNED. FOREARMED.

As a Small Business, your data is your life. Wingman Cyber can insure you against these common, virtually inevitable, cyber threats.

UNAUTHORIZED ACCESS

Wingman covers the costly competitive, and legal, consequences of proprietary assets falling in the wrong hands.

CYBER EXTORTION

When hackers lock down your data for ransom, we cover the damages, whether that means fighting or complying with the demands.

THEFT

We cover the sweeping consequences of stolen PI: notification, fines, triage, legal fees and judgments, reputation repair, and more.

AND MORE

Security consultations. Breach forensics. Emergency Call centers. We advise, repair and protect you for threats you didn't know existed. Until they do. Let your broker be your guide.

SOCIAL ENGINEERING

Hackers pose as a friend, a contact or a cause to worm their way into your data or dollars. We cover that.

TRANSMISSION OF VIRUS OR MALICIOUS CODE

We'll cover loses, from the point of discovery, due to infectious malware, some still invisible even to the best monitoring systems.

BUSINESS INTERRUPTION

Down time can be even costlier than remediation. When cyber breaches shut down operations, we'll cover the customary lost revenue.
